

# Why Support the Loudoun Math and IT Academy Charter School?

- LMITA will be an open enrollment school, providing a new choice for all Loudoun students, including those who are unable to meet the stringent enrollment requirements or who cannot be admitted due to the limited capacity of the Loudoun Academy of Science or Monroe Tech Center programs, but who have an intrinsic interest in math and information technologies.
- LMITA will provide the ability to start a new middle/high school with no capital cost to LCPS.
- LMITA will provide increased opportunity for intensive programmatic partnerships with local businesses and colleges/universities.
- LMITA will provide improved average SOL test scores and graduation rates due to its highly personalized, data-driven education model that recognizes that not every child learns in the same way or at the same pace.
- LMITA will provide improved college admission rates for those headed to college, as well as a pathway directly to the workforce for those on that track.
- LMITA will provide an opportunity to close the achievement gap.
- As a school of choice, LMITA will provide improved attendance/performance with increased parent involvement.
- With the use of technology throughout the curriculum, LMITA will provide improved opportunity for special needs students.
